Whig & Courier.

WASHINGTON, Aug. 31.
Secretary Harlin retired from the Department of the Interior to-day, and was succeeded by a special agent of his subordinates. Appropriate speeches were made. A silver tea pitcher, goblet, and a copy of the Cyclopaedia were presented to J. M. Edwards to-day, who was relieved from the Land Office.

WASHINGTON, Aug. 31.
There is no advice received at the Department of Indian Affairs tending to confirm any reports of Indian outbreaks on the plains. The last intelligence was forwarded about a week ago by Superintendent Taylor of Nebraska, who is believed to treat the disturbances as coming from small detachments of tribes who are afraid to be friendly in their dispositions towards the government—but on the contrary are regarded and treated by the Indians themselves as outlaws and bad characters.

WASHINGTON, Aug. 31.
Judge Edwards, who to-day retired from the office of Commissioner of the General Land Office, will immediately assume the duties of Postmaster of the United States Senate.

FORT KEARNEY, Aug. 31.
Commissioners Simpson, Curtis and White examined and accepted 65 miles of the track of the Union Pacific railway, which crosses the road 13 miles west of this point.

BALTIMORE, Aug. 31.
Colonel Charles E. Phelps, the present Representative of the 5th District of Maryland in Congress, has been re-nominated by the conservatives.

UTICA, N. Y., Aug. 31.
The President made a brief speech at Syracuse. He arrived here late this afternoon. A speech of welcome was made, and the President replied, etc., etc.

WILMINGTON, Aug. 31.
Crude turpentine had advanced—Virginia 3 1/2, Spirit 3 3/4, Spirit turpentine 1 1/4, 1 1/2, 2 1/4, 2 1/2, 2 3/4, 3, 3 1/4, 3 1/2, 3 3/4, 4, 4 1/4, 4 1/2, 4 3/4, 5, 5 1/4, 5 1/2, 5 3/4, 6, 6 1/4, 6 1/2, 6 3/4, 7, 7 1/4, 7 1/2, 7 3/4, 8, 8 1/4, 8 1/2, 8 3/4, 9, 9 1/4, 9 1/2, 9 3/4, 10, 10 1/4, 10 1/2, 10 3/4, 11, 11 1/4, 11 1/2, 11 3/4, 12, 12 1/4, 12 1/2, 12 3/4, 13, 13 1/4, 13 1/2, 13 3/4, 14, 14 1/4, 14 1/2, 14 3/4, 15, 15 1/4, 15 1/2, 15 3/4, 16, 16 1/4, 16 1/2, 16 3/4, 17, 17 1/4, 17 1/2, 17 3/4, 18, 18 1/4, 18 1/2, 18 3/4, 19, 19 1/4, 19 1/2, 19 3/4, 20, 20 1/4, 20 1/2, 20 3/4, 21, 21 1/4, 21 1/2, 21 3/4, 22, 22 1/4, 22 1/2, 22 3/4, 23, 23 1/4, 23 1/2, 23 3/4, 24, 24 1/4, 24 1/2, 24 3/4, 25, 25 1/4, 25 1/2, 25 3/4, 26, 26 1/4, 26 1/2, 26 3/4, 27, 27 1/4, 27 1/2, 27 3/4, 28, 28 1/4, 28 1/2, 28 3/4, 29, 29 1/4, 29 1/2, 29 3/4, 30, 30 1/4, 30 1/2, 30 3/4, 31, 31 1/4, 31 1/2, 31 3/4, 32, 32 1/4, 32 1/2, 32 3/4, 33, 33 1/4, 33 1/2, 33 3/4, 34, 34 1/4, 34 1/2, 34 3/4, 35, 35 1/4, 35 1/2, 35 3/4, 36, 36 1/4, 36 1/2, 36 3/4, 37, 37 1/4, 37 1/2, 37 3/4, 38, 38 1/4, 38 1/2, 38 3/4, 39, 39 1/4, 39 1/2, 39 3/4, 40, 40 1/4, 40 1/2, 40 3/4, 41, 41 1/4, 41 1/2, 41 3/4, 42, 42 1/4, 42 1/2, 42 3/4, 43, 43 1/4, 43 1/2, 43 3/4, 44, 44 1/4, 44 1/2, 44 3/4, 45, 45 1/4, 45 1/2, 45 3/4, 46, 46 1/4, 46 1/2, 46 3/4, 47, 47 1/4, 47 1/2, 47 3/4, 48, 48 1/4, 48 1/2, 48 3/4, 49, 49 1/4, 49 1/2, 49 3/4, 50, 50 1/4, 50 1/2, 50 3/4, 51, 51 1/4, 51 1/2, 51 3/4, 52, 52 1/4, 52 1/2, 52 3/4, 53, 53 1/4, 53 1/2, 53 3/4, 54, 54 1/4, 54 1/2, 54 3/4, 55, 55 1/4, 55 1/2, 55 3/4, 56, 56 1/4, 56 1/2, 56 3/4, 57, 57 1/4, 57 1/2, 57 3/4, 58, 58 1/4, 58 1/2, 58 3/4, 59, 59 1/4, 59 1/2, 59 3/4, 60, 60 1/4, 60 1/2, 60 3/4, 61, 61 1/4, 61 1/2, 61 3/4, 62, 62 1/4, 62 1/2, 62 3/4, 63, 63 1/4, 63 1/2, 63 3/4, 64, 64 1/4, 64 1/2, 64 3/4, 65, 65 1/4, 65 1/2, 65 3/4, 66, 66 1/4, 66 1/2, 66 3/4, 67, 67 1/4, 67 1/2, 67 3/4, 68, 68 1/4, 68 1/2, 68 3/4, 69, 69 1/4, 69 1/2, 69 3/4, 70, 70 1/4, 70 1/2, 70 3/4, 71, 71 1/4, 71 1/2, 71 3/4, 72, 72 1/4, 72 1/2, 72 3/4, 73, 73 1/4, 73 1/2, 73 3/4, 74, 74 1/4, 74 1/2, 74 3/4, 75, 75 1/4, 75 1/2, 75 3/4, 76, 76 1/4, 76 1/2, 76 3/4, 77, 77 1/4, 77 1/2, 77 3/4, 78, 78 1/4, 78 1/2, 78 3/4, 79, 79 1/4, 79 1/2, 79 3/4, 80, 80 1/4, 80 1/2, 80 3/4, 81, 81 1/4, 81 1/2, 81 3/4, 82, 82 1/4, 82 1/2, 82 3/4, 83, 83 1/4, 83 1/2, 83 3/4, 84, 84 1/4, 84 1/2, 84 3/4, 85, 85 1/4, 85 1/2, 85 3/4, 86, 86 1/4, 86 1/2, 86 3/4, 87, 87 1/4, 87 1/2, 87 3/4, 88, 88 1/4, 88 1/2, 88 3/4, 89, 89 1/4, 89 1/2, 89 3/4, 90, 90 1/4, 90 1/2, 90 3/4, 91, 91 1/4, 91 1/2, 91 3/4, 92, 92 1/4, 92 1/2, Whig & Courier

Humor Brotherton.

The moonlight glimmering with the pomp of state. Wear the same dress as those that died of war. Like them the world shall be his bathroom mate. When he retires his eyes are closed.

The beauty, who is the life of the party. On whom a hundred glances are cast admiring. To the house of the lady, the beauty is the life of the party.

The scholar, gliding in the stamp of mind. Master of all the wisdom of the world. To the whole class of the school, the scholar is the life of the party.

Therefore, let human sympathy be strong. Let each man share his wealth with his neighbor. To the whole class of the school, the scholar is the life of the party.

His Wife About Him.

I certainly thought he was 'out of his head.' He had such peculiar ways and such peculiarities, that he was almost as if he was in a somnambulistic state almost; that is, I don't know what he was doing, but he never seemed to take the least notice of what happened about him. He was like a man who had been hypnotized, and he was like a man who had been hypnotized.

His name was Joseph Harrison, and he was a student at the academy in Bangor. One of the style of academics that seem to have nearly gone out of date now, where both boys and girls were sent to school. I attended the Sanford school. The principal's house was on the corner across the way from the academy, and he boarded a dozen or so of the students. It was one of these boarding houses.

I shall never forget the day Mr. Harrison came to the house to board. I was sitting on the second floor piazza, studying. It was late in the afternoon, and the sun was low in the sky. I looked out to look at him, and when he was just under the door, I noticed a drop of water. I struck him on the shoulder, and he fell back. He was looking at me and looked at it quietly, and then poked it aside with his big cane.

What does he carry that big cane for? thought I, and why look at me with my book, or look under me, or do anything rational being would?

He hung the bell, and I saw no more of him till the next day. He sat directly opposite me at the table. I would say before that he never looked at me, or, indeed, any one else, it seemed, which was the reason, perhaps, why I looked at him more than I did at any other young man in my life.

After tea, we gathered in the parlor, as we were in the habit of doing, and he was introduced to me. He bowed, and then for the first time, he looked at me. He looked through me, as if he saw something behind me, and my head was as transparent as glass. Then he smiled and turned away.

I confess I was provoked at the manner of the young man. What amused him I should like to know. When Belle Harrison asked me afterward how I liked her cousin, I said I did not like him at all. She only laughed, and said she believed nobody ever liked him first.

Somewhat asked me to sing. I seated myself at the piano and gave a song in my best manner. I was not a very good singer, but I was not an inferior singer by any means. My voice was good, and I had received the best musical culture. What mysterious influence was at work upon me that day? For, I never I thought of singing before in my life. I certainly did not know Mr. Harrison, but it is true, notwithstanding, that I sang for him, and when I turned away from the piano, it was with a peculiar curiosity.

I anticipated his comments, if he chose to make any, or his manner and its meaning it he chose to hold his tongue.

It was as if he were looking at me, and his back to the company. Was there ever such a clever fellow?

What is the matter with that beautiful song asked Orville Redway, a young man from the village, who had been invited to tea, and sat with us in the parlor.

I said to him, "I must have said, 'it is exquisite.' And he took out his pen and wrote on a card the name of the piece. He broke his pencil lead. Will some one lend me a pencil, please?" I asked.

Mr. Harrison heard the question, though he was still looking at the painting, and produced a large pocket-knife, which he handed to Mr. Redway.

"It is very sharp," said he, "be careful." The first thing Redway did was to cut his hand. The blood spurted out in jets. He turned pretty white, but just guided this blood in his handkerchief, and said it was a mere scratch of no consequence.

"Beg your pardon, sir," Mr. Harrison spoke, "it is of some consequence. You'll lose your life if you don't look out. I will see you."

He took his own handkerchief and held it loosely around Redway's arm. Then he took his knife and cut carefully, but it under the handkerchief next to the arm and began to twist it about. As the handkerchief tightened on the arm, the blood ceased to flow.

"And for a doctor," said Mr. Harrison. "A doctor! after that?" "Isn't that a good deal of fuss over a little cut?" "A little cut," said Mr. Harrison, "when you cut an artery, it is a big cut."

Dr. Minner was the present visitor, and he returned to his inspection of the painting. He seemed to be very much interested in it. Young Harrison, as I have said, was a just returned to his inspection of the painting. He seemed to be very much interested in it. Young Harrison, as I have said, was a just returned to his inspection of the painting.

The knife lay on the table. Out of pure imprudence, or some similar feeling, I took the knife and cut the artery. I cut the artery, and the blood spurted out in jets. I screamed loudly, for it was a horrid wound, and the blood flowed copiously.

Well, upon my word," remarked Mr. Harrison. "Here, another."

Another? How contemptuous the word sounded to me! U. S. Marshal Bailey. Monroe, confessedly a bully, a beauty, and a lady of rare accomplishments. Besides, believe me, he was a hundred thousand dollars worth just another. Why didn't he call me a person and done with it?

And a little more and said, put on it, said he, that will stop the bleeding. It is a mere trifle.

It may have been a trifle, but it was enough to make me swoon. Or perhaps I swooned out of downright vexation at the man. When I recovered, he was gone. By and by when Belle and I were alone, we reasoned together. I asked her what Mr. Harrison said and did when I fainted.

He said, "he put it all right. Lay her on her back and leave her alone."

"Is that all he said?" "No, not quite. Some one brought the flour and salt, and he put it all right. Lay her on her back and leave her alone."

I should certainly hate this young man. After that he became such an object of interest to me, that I could hardly keep my mind off him, or hear of him at a time.

I was not long in learning something of his history. It seemed that some of the adventures had been his, and he was a great traveler. He had been to all the great cities of the world, and he was a great traveler.

Why a man of his advanced age should be so full of life, and so full of adventures, I could not understand. I was not long in learning something of his history. It seemed that some of the adventures had been his, and he was a great traveler.

Why a man of his advanced age should be so full of life, and so full of adventures, I could not understand. I was not long in learning something of his history. It seemed that some of the adventures had been his, and he was a great traveler.

THE KIDNEYS.

The kidneys are two in number, situated at the upper part of the loins, surrounded by fat and encased in a double coat of peritoneum. They are connected by a network of blood vessels, and are the principal organs of the urinary system. They are also the principal organs of the body's excretory system.

The bladder is composed of various cavities or pouches, which are situated in the pelvic region. It is the principal organ of the urinary system, and is the reservoir for the urine. It is also the principal organ of the body's excretory system.

The ureters are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

THE KIDNEYS.

The kidneys are two in number, situated at the upper part of the loins, surrounded by fat and encased in a double coat of peritoneum. They are connected by a network of blood vessels, and are the principal organs of the urinary system. They are also the principal organs of the body's excretory system.

The bladder is composed of various cavities or pouches, which are situated in the pelvic region. It is the principal organ of the urinary system, and is the reservoir for the urine. It is also the principal organ of the body's excretory system.

The ureters are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The prostate gland is a single gland, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The testicles are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The vas deferens are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The epididymis are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the glands through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The spermatic cord are two in number, and are situated in the pelvic region. They are the principal organs of the urinary system, and are the channels through which the urine is excreted from the body. They are also the principal organs of the body's excretory system.

The scrotum is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the gland through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The penis is a single organ, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

The urethra is a single tube, which is situated in the pelvic region. It is the principal organ of the urinary system, and is the channel through which the urine is excreted from the body. It is also the principal organ of the body's excretory system.

THE KIDNEYS.
